

SatStation SolarBoost X

The SatStation Solarboost X has a 20000mAh High Capacity Li-polymer battery, it can charge your phones 8-10 times or tablets 3-4 times for an average of 9 days of usage per charge. The Solarboost X comes with 4 fold-able high-efficiency solar panels that charge up to 4-6 times faster than other solar chargers, with up to 1A input current under the sunlight. The included micro USB cable can be used to charge the device conventionally. The Dual 2.1A USB ports allow you to charge 2 devices simultaneously with 2.1A high speed charging while auto detecting your devices' for the optimal output. The Solarboost X rugged construction is dust, shock and waterproof, with a built in LED flashlight with SOS mode making it perfect for outdoor emergencies.

Product Specifications:

- Solar panel: 4.5W monocrystalline silicon
- Battery: Li-ion Polymer Battery
- Material: ABS+TPU
- Output: Dual USB 5V/2.1A
- input: Micro USB 5V 2A
- Size: 162*88*36mm 20000mah
- USB cable
- Carabiner

SKU: SAT-SOLX
